DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, and 15-20 are drawn to communication over free space having a plurality of contiguous regions served by respective fixed stations, classified in class 370, subclass 328.
 - II. Claims 4-14 are drawn to radiotelephone system with home location registration (HLR) or visitor location registration (VLR), classified in class 455, subclass 433.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I is concerned with a method of accessing an authentication function for use in an H.323 communications network; while invention II is concerned with a method of accessing a home location functionality for H.323 mobility management. See MPEP § 806.05(d).
3. Because these invention are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
